

SKF BAHB 633967

Ball bearing, hub bearing unit, SKF Agri Hub

SKF Agri Hubs are maintenance-free, sealed bearing units, providing major advantages for both original equipment manufacturers and final customers. Prepared with grease and sealed, SKF Agri Hubs do not need grease refill and reduce the risk for grease spillage. Thanks to their high stiffness, the risk for disc tilt is minimized and machine reliability is further improved.

Technical specifications

Dimensions	
Bore diameter	35 mm
Width, total	37 mm
Performance	
Basic dynamic load rating	44.2 kN
Basic static load rating	31 kN
Properties	
Application	For individual disc mowers application
Bore type	Cylindrical
Lubricant	Grease
Material, bearing	Bearing steel
Sealing	With
Sealing type	Contact
Sealing, unit	Axle seal
Standard	Not standardized
Logistics	
Product net weight	0.535 kg
eClass code	23-05-16-90
UNSPSC code	31171503
