

SKF PHE F120NRTYRE

Flex coupling tyre, natural rubber

Flex (tyre) couplings are designed to accommodate misalignment and shock loads and dampen vibration levels. These easy to install, vitually maintenance-free couplings consist of 2 flanges and 1 tyre. The flanges are phosphate coated for improved corrosion resistance, and the flex tyres are available in natural rubber.

Technical specifications

Dimensions	
Diameter	314 mm
Properties	
Category	Flex couplings
Component	Element
Size	F120
Logistics	
Product net weight	1.45 kg
eClass code	23-03-10-90
UNSPSC code	31171537
