

SKF PHE L150-24MM

Jaw standard coupling hub with keyway, bored to size

Jaw couplings provide a cost-effective solution for standard power applications, cushioning moderate shock loads and dampening low vibration levels. Virtually maintenance-free and easy to install, jaw couplings are available with a “snap wrap” element, allowing element replacement in situ. This makes them the most popular coupling in the world. A complete Jaw coupling consists of 2 hubs and 1 insert.

Technical specifications

Dimensions	
Bore diameter max	48 mm
Diameter	96 mm
Hub length	45 mm
Properties	
Category	Jaw couplings
Component	HUB
Material	Cast Iron
Size	L150
Logistics	
Product net weight	2.36 kg
eClass code	23-03-10-90
UNSPSC code	31171537
