

SKF PHG 2590-14M-S440

HTD belt sleeve

Belts provide a very efficient and cost-effective method for transmitting power from prime movers to driven machines. High torque drive (HTD) timing belts have teeth that interlock with the corresponding grooves on the pulleys to ensure a constant speed ratio. The low stretch glass fibre cords guarantee excellent dimensional stability. The oil and heat resistant neoprene rubber cushion provides high shear resistance. The belt sleeve can be cut to the desired belt width.

Technical specifications

Dimensions	
Pitch length	2590 mm
Tooth depth	6 mm
Tooth height	10 mm
Tooth pitch	14 mm
Width	440 mm

Properties	
Number of teeth	185
Section	14M
Sleeve	Yes

Logistics	
Product net weight	11.6 kg
eClass code	23-17-02-90
UNSPSC code	26111504
