

# SKF PHG AX24

## Cogged raw-edge classical V-belt

Belts provide a very efficient and cost-effective method for transmitting power from prime movers to driven machines. These raw-edge classical V-belts have cogs on their inside to enable the belts to flex around smaller pulleys. Without fabric covering their flanks, raw-edge belts can provide a higher friction and a minimized loss of power through slippage. The EPDM synthetic rubber cushion can significantly increase the life of belt drives when operating at high ambient temperatures.

## Technical specifications

Dimensions	
Height	8.5 mm
Inner length	609.6 mm
Pitch length	640 mm
Width, top	13 mm

  

Properties	
Cogged	Yes
Material	EPDM rubber (ethylene propylene diene monomer )
Section	A
Tensile cord	Polyester
Wrapped Cover	No

  

Logistics	
Product net weight	0.0591 kg
eClass code	23-17-02-90
UNSPSC code	26111504
