Locking clip for metric lock nuts

MS locking clips are locking devices, used to secure HM and HME lock nuts onto a shaft or adapter sleeve and prevent unintentional loosening. The locking clips engage a keyway in the shaft or adapter sleeve and one of the slots in the outside diameter of the lock nut. A bolt attaches the clips to the side face of the lock nut. A new locking clip should be used each time the corresponding lock nut is installed.

Technical specifications

Dimensions	
Width	20 mm
Height	12 mm
Thickness material	4 mm
Key width	17.5 mm
Hole diameter	9 mm
Included products	
Hexagonal head bolt	M8x16
Spring washer in accordance with DIN 128	A 8
Properties	
Locking device	Locking clip
Logistics	
Product net weight	0.038 kg
eClass code	23-11-07-05
UNSPSC code	31163218
