

SKF U 310

Sphered seat washer for thrust ball bearings

Sphered seat washers are used together with thrust ball bearings with sphered housing washers when the bearing is fitted into a machine component manufactured with a flat surface. The seat washers are supplied as separate components. Depending on bearing series, they have the basic designation U 2, U 3 or U 4 followed by a two-digit number, which identifies the size, e.g. sphered seat washer U 320 for bearing 53320.

Technical specifications

Dimensions	
Bore diameter	72 mm
Outside diameter	100 mm
Height	11 mm

Properties	
Material	Bearing steel
Coating	Without
Indicative carbon footprint for new product	0.83 kg CO ₂ e

Logistics	
Product net weight	0.23 kg
eClass code	23-05-10-01
UNSPSC code	31171507
