## Double classical (Hex) V-belt

Belts provide a very efficient and cost-effective method for transmitting power from prime movers to driven machines. Double classical (Hex) V-belts are similar to a pair of mirrored V-belts with the cords strongly bonded at the widest part of the belt. The design enables the belts to transmit power from both sides with an equal load distribution and without any additional belt wear.

### Technical specifications

Dimensions	
Height	10 mm
Inner length	1956 mm
Pitch length	2000 mm
Width, top	13 mm

  

Properties	
Cogged	No
Material	CR (polychloroprene)
Section	AA
Tensile cord	Polyester
Wrapped Cover	Yes

  

Logistics	
Product net weight	0.46 kg
eClass code	23-17-02-90
UNSPSC code	26111504
