

## SKF PHG 190-XL-037

### Classical timing belt

Belts provide a very efficient and cost-effective method for transmitting power from prime movers to driven machines. Classical timing belts have teeth that interlock with the corresponding grooves on the pulleys to ensure a constant speed ratio. The low stretch glass fibre tensile cords guarantee excellent dimensional stability. The oil and heat resistant neoprene rubber cushion provides high shear resistance.

### Technical specifications

| Dimensions   |          |
|--------------|----------|
| Pitch length | 482.6 mm |
| Tooth angle  | 50 °     |
| Tooth depth  | 1.27 mm  |
| Tooth height | 2.3 mm   |
| Tooth pitch  | 5.08 mm  |
| Width        | 9.4 mm   |

| Properties      |    |
|-----------------|----|
| Number of teeth | 95 |
| Section         | XL |
| Sleeve          | No |

| Logistics          |             |
|--------------------|-------------|
| Product net weight | 0.01 kg     |
| eClass code        | 23-17-02-90 |
| UNSPSC code        | 26111504    |
