

SKF LAGF 50

Grease filler pump for use on drums

Best lubrication practices say that each type of grease requires an individual grease gun and that the refilling has to be a clean process. SKF Grease Filler Pumps are designed to achieve this goal. The LAGF 50 is operated with a mechanical lever and enables optimum cleanliness for filling grease guns from a 50 kg drum.

Technical specifications

Dimensions	
Suitable drum inner diameter	Array mm
Suitable drum inside height (max)	675 mm

Performance	
Maximum pressure (P_{max})	3 MPa

Properties	
Recommended applications	grease filler pump for drums or pails designed to fill grease guns or TLRD grease dispensers
For type/size of grease drum	50 kg grease drum
Operation	manual pump with handle
Mobility	stationary
NLGI class of lubricant (max)	2
Connection	greasing point: DIN 1283 nipple
Air pressure	Array bar
Pressure ratio	0
Volume per stroke	45 ml
Hose	No
Optional Trolley	LAGT 18 - 50
Power source	manual
Material	steel
Material handle	steel with plastic grip
Ambient temperature range	Array °C
Recommended storage temperature	Array °C
Relative humidity	< 65 %
Content	grease pump with pump handle, drum cover plate, drum followerplate

Logistics	
Product net weight	6.08 kg
eClass code	23-06-91-06
UNSPSC code	15121902
