

# SKF HN 16

## Hook spanner

The SKF Hook spanner, size 16, is designed for easy tightening and loosening of lock nuts. They are used to secure and adjust bearings on tapered journals, adapter sleeves and withdrawal sleeves. They fit on a variety of lock nuts with outer diameter(s) 105 mm. To be more specific for locknuts: KM 16, KMK 16, KMFE 16, KMT 15 and AN 16.

## Technical specifications

| Dimensions                                        |          |
|---------------------------------------------------|----------|
| Locknut size                                      | Array    |
| Outer diameter lock nut (range) (d <sub>3</sub> ) | Array mm |
| Nose width (N <sub>k</sub> )                      | 8 mm     |
| Nose height (N <sub>h</sub> )                     | 4 mm     |
| Thickness (n)                                     | 8 mm     |
| Length (L)                                        | 284 mm   |
| Working length (l)                                | 240 mm   |
| Height (H)                                        | 66 mm    |

  

| Properties                                                     |                                                                                                                                    |
|----------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Recommended applications                                       | For applications that require tightening/loosening a wide variety of lock nuts on shafts, adapter sleeves, and withdrawal sleeves. |
