

## SKF U 309

### Sphered seat washer for thrust ball bearings

Sphered seat washers are used together with thrust ball bearings with sphered housing washers when the bearing is fitted into a machine component manufactured with a flat surface. The seat washers are supplied as separate components. Depending on bearing series, they have the basic designation U 2, U 3 or U 4 followed by a two-digit number, which identifies the size, e.g. sphered seat washer U 320 for bearing 53320.

## Technical specifications

| Dimensions       |       |
|------------------|-------|
| Bore diameter    | 65 mm |
| Outside diameter | 90 mm |
| Height           | 10 mm |

| Properties                                  |                           |
|---------------------------------------------|---------------------------|
| Material                                    | Bearing steel             |
| Coating                                     | Without                   |
| Indicative carbon footprint for new product | 0.61 kg CO <sub>2</sub> e |

| Logistics          |             |
|--------------------|-------------|
| Product net weight | 0.17 kg     |
| eClass code        | 23-05-10-01 |
| UNSPSC code        | 31171507    |
