

SKF KM 25

Lock nut with metric thread, for locking by lock washer

KM and KML lock nuts are used to locate bearings onto a shaft. They have metric threads and four equally spaced slots located around their circumference to accommodate a spanner. They should be locked by a lock washer to prevent unintentional loosening. KM and KML lock nuts can be reused, provided they are not damaged.

Technical specifications

Dimensions	
Thread	M125x2
Outside diameter	160 mm
Width	21 mm
Diameter locating side face	148 mm
Width locating slot	12 mm
Depth locating slot	5 mm
Thread designation	M125x2
Bore diameter	125 mm
Calculation data	
Axial static load carrying capacity	360 kN
Mounting information	
Associated spanner	TMFN 23-30
Associated products	
Locking device	MB 25
Properties	
Locking device	Lock washer
Nut for hydraulic mounting	No
Associated mounting tool	TMFN 23-30
Logistics	
Product net weight	1.11 kg
eClass code	23-11-07-05
UNSPSC code	31163218
