

## SKF PHG 1400-H-200

### Classical timing belt

Belts provide a very efficient and cost-effective method for transmitting power from prime movers to driven machines. Classical timing belts have teeth that interlock with the corresponding grooves on the pulleys to ensure a constant speed ratio. The low stretch glass fibre tensile cords guarantee excellent dimensional stability. The oil and heat resistant neoprene rubber cushion provides high shear resistance.

### Technical specifications

| Dimensions   |         |
|--------------|---------|
| Pitch length | 3556 mm |
| Tooth angle  | 40 °    |
| Tooth depth  | 2.29 mm |
| Tooth height | 4.3 mm  |
| Tooth pitch  | 12.7 mm |
| Width        | 50.8 mm |

| Properties      |     |
|-----------------|-----|
| Number of teeth | 280 |
| Section         | H   |
| Sleeve          | No  |

| Logistics          |             |
|--------------------|-------------|
| Product net weight | 0.7 kg      |
| eClass code        | 23-17-02-90 |
| UNSPSC code        | 26111504    |
