

## SKF PHF TB3535X42MM

### Taper bushing

Bushings and hubs are available in many variants, offering specific benefits in power transmission applications ranging from automotive to papermaking. Taper bushings have a split, flangeless design with a tapered outside diameter that matches the tapered bore of a pulley, sprocket or coupling. The bushings are easy to install and, after being tightened, they provide a firm and secure grip on the shaft.

### Technical specifications

| Dimensions         |                |
|--------------------|----------------|
| Bore diameter      | 42 mm          |
| Outside diameter   | 127 mm         |
| Width              | 89 mm          |
| Properties         |                |
| Bushing number     | 3535           |
| Category           | Taper bushings |
| Material           | Cast iron      |
| Logistics          |                |
| Product net weight | 6.1 kg         |
| eClass code        | 23-05-19-01    |
| UNSPSC code        | 31171605       |
