## HTD belt

Belts provide a very efficient and cost-effective method for transmitting power from prime movers to driven machines. High torque drive (HTD) timing belts have teeth that interlock with the corresponding grooves on the pulleys to ensure a constant speed ratio. The low stretch glass fibre cords guarantee excellent dimensional stability. The oil and heat resistant neoprene rubber cushion provides high shear resistance.

## Technical specifications

| Dimensions         |             |
|--------------------|-------------|
| Pitch length       | 1778 mm     |
| Tooth depth        | 6.1 mm      |
| Tooth height       | 10 mm       |
| Tooth pitch        | 14 mm       |
| Width              | 55 mm       |
| Properties         |             |
| Number of teeth    | 127         |
| Section            | 14M         |
| Sleeve             | No          |
| Logistics          |             |
| Product net weight | 0.78 kg     |
| eClass code        | 23-17-02-90 |
| UNSPSC code        | 26111504    |
