

SKF PHG DA-890-5M-15

Double-sided HTD belt

Belts provide a very efficient and cost-effective method for transmitting power from prime movers to driven machines. Double-sided high torque drive (HTD) timing belts have teeth on both sides of the belt that interlock with the corresponding grooves on the pulleys to ensure a constant speed ratio. The low stretch glass fibre cords guarantee excellent dimensional stability. The oil and heat resistant neoprene rubber cushion provides high shear resistance.

Technical specifications

Dimensions	
Pitch length	890 mm
Thickness between teeth	1.1 mm
Tooth height	5.3 mm
Tooth pitch	5 mm
Width	15 mm

Properties	
Number of teeth	356
Section	D-5M

Logistics	
Product net weight	0.0673 kg
eClass code	23-17-02-90
UNSPSC code	26111504
