

SKF PHF SK-48MM

QD bushing

Bushings and hubs are available in many variants, offering specific benefits in power transmission applications ranging from automotive to papermaking. QD (quick disconnect) bushings have a split, heavy duty flanged design with a tapered outside diameter that matches the bore of a pulley, sprocket or coupling. The bushings are easy to install and, after being tightened, they provide a clamping force on the shaft that is equivalent to that of a shrink fit.

Technical specifications

Dimensions	
Bore diameter	48 mm
Width, total	49.02 mm
Flange diameter	98.55 mm
Flange thickness	14.22 mm
Width, bushing seat	31.75 mm
Properties	
Bushing type	SK
Category	QD bushings
Logistics	
Product net weight	2 kg
eClass code	23-05-19-01
UNSPSC code	31171605
