

SKF PHE UJMA20

Single universal joint coupling

Universal joints, also known as pin and block couplings, are commonly used for low to medium torque industrial, off-road and agricultural applications. These couplings offer an economical solution for applications up to 1 800 r/min and will provide working angles of up to 25° or 35° for manual drives. SKF offers these couplings with a solid bore from stock, bored to size, square, hexagonal and round bores on request.

Technical specifications

Dimensions	
Bore diameter max	10 mm
Hub diameter	20 mm
Length	62 mm

Properties	
Size	A20
Type	Single

Logistics	
Product net weight	0.13 kg
eClass code	23-03-10-90
UNSPSC code	31171537
