

## SKF PHF TB2012X19MM

### Taper bushing

Bushings and hubs are available in many variants, offering specific benefits in power transmission applications ranging from automotive to papermaking. Taper bushings have a split, flangeless design with a tapered outside diameter that matches the tapered bore of a pulley, sprocket or coupling. The bushings are easy to install and, after being tightened, they provide a firm and secure grip on the shaft.

### Technical specifications

| Dimensions       |         |
|------------------|---------|
| Bore diameter    | 19 mm   |
| Outside diameter | 69.9 mm |
| Width            | 31.8 mm |

| Properties     |                |
|----------------|----------------|
| Bushing number | 2012           |
| Category       | Taper bushings |
| Material       | Cast iron      |

| Logistics          |             |
