

SKF PHE 15GCKIT

Gear coupling assembly kit

Gear couplings are heavy duty couplings with incredible design flexibility, making them an economical choice for many applications. Very high-torque ratings, along with unparalleled bore capacities, give these couplings a great advantage over other types of couplings. A complete gear coupling consists of 2 hubs, 2 covers and 1 assembly kit.

Technical specifications

Properties	
Category	Gear couplings
Size	15

Logistics	
Product net weight	0.36 kg
eClass code	23-03-10-90
UNSPSC code	31171537
