

SKF PHG VS28X8X650

Variable speed belt

Belts provide a very efficient and cost-effective method for transmitting power from prime movers to driven machines. Variable speed belts are wider and thinner than standard V-belts and are used for applications where changes in speed are common. The cogs on the inside make the belts extremely flexible and helps heat dissipation. These belts combine the tensile strength of polyester or Kevlar cords, with a high transverse rigidity across the belt for width stability.

Technical specifications

Dimensions	
Height	8 mm
Inner length	650 mm
Pitch length	681 mm
Width	28 mm

Properties	
Number of ribs	1
Section	VS

Logistics	
Product net weight	0.16 kg
eClass code	23-17-02-90
UNSPSC code	26111504
