

## SKF H 2309

Adapter sleeve with KM lock nut and MB lock washer, metric dimensions

Adapter sleeves are the most commonly used components for locating bearings with a tapered bore onto a cylindrical seat as they can be used on plain shafts or stepped shafts. They are slit and are supplied complete with a KM lock nut and a MB lock washer.

### Technical specifications

| Dimensions                           |             |
|--------------------------------------|-------------|
| Bore diameter                        | 40 mm       |
| Outside diameter small taper         | 45 mm       |
| Outside diameter lock nut            | 65 mm       |
| Width                                | 50 mm       |
| Width lock nut                       | 10 mm       |
| Width lock nut including lock washer | 11 mm       |
| Thread                               | M45x1.5     |
| External taper                       | 1:12        |
| Thread designation                   | M45x1.5     |
| Included products                    |             |
| Lock nut                             | KM 9        |
| Locking device                       | MB 9        |
| Properties                           |             |
| Taper                                | 1:12        |
| Holes for oil injection              | Without     |
| Logistics                            |             |
