## Banded wedge belt

Belts provide a very efficient and cost-effective method for transmitting power from prime movers to driven machines. Banded wedge belts are made up of two or more belts that are joined together on the top with a reinforced rubber band. This design provides an excellent transverse rigidity that prevents belt turnover, reduces vibration and eliminates excessive belt slip in case of heavy starts of the drive.

## Technical specifications

| Dimensions   |         |
|--------------|---------|
| Height       | 22.6 mm |
| Pitch length | 4250 mm |

| Properties    |                      |
|---------------|----------------------|
| Cogged        | No                   |
| Material      | CR (polychloroprene) |
| Section       | SPC                  |
| Tensile cord  | Polyester            |
| Wrapped Cover | Yes                  |

| Logistics          |             |
|--------------------|-------------|
| Product net weight | 9.44 kg     |
| eClass code        | 23-17-02-90 |
| UNSPSC code        | 26111504    |
