

SKF TSN 522 A

V-ring seal

V-ring seals consist of a V-ring and a sheet steel sealing washer with a vulcanized rubber lip. The rubber lip fits into the seal groove in the housing. The washer is protected against corrosion. The seals are used to protect bearings from contamination or as secondary seals to protect primary seals in highly contaminated environments. They are a cost-effective and easy to install contaminant barrier for all kind of shafts. They are available in nitrile rubber. When ordering, please note that one item (seal pack) contains two seals.

Technical specifications

General	
Material	Nitrile rubber with steel element
Dimensions	
Shaft diameter	100 mm
Diameter of seal groove	157.5 mm
Width	11 mm
Housing groove diameter	157.5 mm
Properties	
Accessory type	Housing seal
Sealing type	V-ring
Material	Nitrile rubber with steel element
Logistics	
Product net weight	0.373 kg
eClass code	23-05-17-90
UNSPSC code	31171519
