

SKF PHG 700-H-S1800

Classical timing belt sleeve

Belts provide a very efficient and cost-effective method for transmitting power from prime movers to driven machines. Classical timing belts have teeth that interlock with the corresponding grooves on the pulleys to ensure a constant speed ratio. The low stretch glass fibre cords guarantee excellent dimensional stability. The oil and heat resistant neoprene rubber cushion provides high shear resistance. The belt sleeve can be cut to the desired belt width.

Technical specifications

Dimensions	
Pitch length	1778 mm
Tooth angle	40 °
Tooth depth	2.29 mm
Tooth height	4.3 mm
Tooth pitch	12.7 mm
Width	457.2 mm

Properties	
Number of teeth	140
Section	H
Sleeve	Yes

Logistics	
Product net weight	3.52 kg
eClass code	23-17-02-90
UNSPSC code	26111504
