

SKF PHC 20B-1DRX10FT

Corrosion resistant simplex chain, dacrotized, British standard (BS)

Chains are critical components in power transmission systems. Robust quality chain drives extend mean time between failures, which reduces maintenance costs. Dacrotized coating is an exceptional anti-corrosion treatment for carbon steel chains. Chains with dacrotized coating are suitable for extremely corrosive environments, where they can operate without loss of strength.

Technical specifications

Dimensions	
Pitch	31.75 mm
Roller diameter max	19.05 mm
Width between inner plates min	19.56 mm
Pin diameter max	10.19 mm
Plate height max	26.4 mm
Plate thickness max	3.5 mm

Properties	
Chain number	20B-1DR
Standard	BS
Category	Transmission chains
Type	Transmission chain
Material	Carbon steel
Coating	Dacromate
Weight per meter	3.7 kg

Logistics	
Product net weight	11 kg
eClass code	23-17-04-90
UNSPSC code	26111505
