

SKF TMA200-005

Machinery shim pack

SKF Machinery Shims are used to easily and reliably adjust the height of a machine. High quality shims allow accurate and long lasting height adjustments that save time and support reliable operation of the machine. Shims are supplied in packs of 10 and can be used to refill SKF Machinery Shim kits (assortments of different shim sizes and thickness).

Technical specifications

Properties	
Material	Stainless steel, 304S31
Logistics	
Product net weight	0.12 kg
eClass code	23-05-19-01
UNSPSC code	27113202
