

SKF PHE L050HUB

Jaw standard coupling hub with solid bore

Jaw couplings provide a cost-effective solution for standard power applications, cushioning moderate shock loads and dampening low vibration levels. Virtually maintenance-free and easy to install, jaw couplings are available with a “snap wrap” element, allowing element replacement in situ. This makes it the most popular coupling in the world. A complete jaw coupling consists of 2 hubs and 1 insert.

Technical specifications

Dimensions	
Bore diameter max	15 mm
Diameter	27.5 mm
Hub length	16 mm
Properties	
Category	Jaw couplings
Component	HUB
Material	Cast Iron
Size	L050
Logistics	
Product net weight	0.046 kg
eClass code	23-03-10-90
UNSPSC code	31171537
