

SKF 48290/Q

Single row tapered roller bearing, cone

Tapered roller bearing cones (inner ring with rollers and cage) are intended to be combined with cups (outer ring) from the same series. Together they create a complete bearing that accommodates combined radial and axial loads and provides low friction during operation. By mounting one single row tapered roller bearing against another and applying a preload, a rigid bearing application can be achieved.

Technical specifications

Dimensions	
Bore diameter	127 mm
Width, total	38.1 mm
Width, inner ring	38.1 mm

Performance	
Basic dynamic load rating	229 kN
Basic static load rating	440 kN

Properties	
Bearing part	Inner ring, cage and roller assembly (cone assembly)
Bore type	Cylindrical
Cage	Sheet metal
Arrangement of contact angle (double-row bearing)	Not applicable
Matched arrangement	No
Coating	Without
Sealing	Without
Lubricant	None
Relubrication feature	Without
Unit system	Inch
Indicative carbon footprint for new product	7.8 kg CO ₂ e

Logistics	
Product net weight	2.17 kg
eClass code	23-05-09-10
UNSPSC code	31171516
