

SKF PHG 900-H-300

Classical timing belt

Belts provide a very efficient and cost-effective method for transmitting power from prime movers to driven machines. Classical timing belts have teeth that interlock with the corresponding grooves on the pulleys to ensure a constant speed ratio. The low stretch glass fibre tensile cords guarantee excellent dimensional stability. The oil and heat resistant neoprene rubber cushion provides high shear resistance.

Technical specifications

Dimensions	
Pitch length	2286 mm
Tooth angle	40 °
Tooth depth	2.29 mm
Tooth height	4.3 mm
Tooth pitch	12.7 mm
Width	76.2 mm

Properties	
Number of teeth	180
Section	H
Sleeve	No

Logistics	
Product net weight	3.02 kg
eClass code	23-17-02-90
UNSPSC code	26111504
