

# SKF PHF TB1008X20MM

## Taper bushing

Bushings and hubs are available in many variants, offering specific benefits in power transmission applications ranging from automotive to papermaking. Taper bushings have a split, flangeless design with a tapered outside diameter that matches the tapered bore of a pulley, sprocket or coupling. The bushings are easy to install and, after being tightened, they provide a firm and secure grip on the shaft.

## Technical specifications

Dimensions	
Bore diameter	20 mm
Outside diameter	35.2 mm
Width	22.2 mm

Properties	
Bushing number	1008
Category	Taper bushings
Material	Cast iron

Logistics	
Product net weight	0.08 kg
eClass code	23-05-19-01
UNSPSC code	31171605
